

Product Specification

| Width | 1350 mm <br> $(+0.15 \mathrm{~m} \mathrm{Flap})$ |
| :---: | :---: |
| Length | 22.25 m |
| Thickness | 4.0 mm (Nominal) |
| Area | $30 \mathrm{~m}^{2}$ |
| Roll Weight | 11.5 kg (Approx.) |
| Product Code | RC-104 AG |

## AUSTRALIAN MADE NCC/BCA Compliant

## PRODUCT DESCRIPTION

Rhino Cell 104 is a 3 in 1 insulation, vapour barrier and radiant heat barrier for use in roof, wall and floor systems. The fibre-free, non-allergenic, formaldehyde free materials used in Rhino Cell provide a safe solution which is also easy to install. Rhino Cell is strong, durable, has low flammability index ( $\leqslant 5$ ) in accordance with AS1530.2 and achieves a Thermal Break of R-0.10.

Available in Blue Antiglare surface finish.
Unique: 150 mm flap eliminates need for overlap, saving up to $10 \%$.

| Product Code | Description | Thickness (mm) | R-Value $\left(\mathrm{m}^{2} \mathrm{~K} / \mathrm{W}\right)$ | Dimensions $(\mathrm{m})$ | $\mathrm{m}^{2} /$ pack |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| RC-104 AG | Rhino Cell Antiglare | 4 mm | $\mathrm{R}-0.10$ | $1.35(+0.15 \mathrm{~m}$ flap) $\times 22.25$ | 30 |

## FINISHED PRODUCT PERFORMANCE

## Compliance to AS 4859.1 \& AS 4200.1

This product should be installed in accordance with AS 4200.2.

| Description | Parameter |
| :--- | :--- |
| Emissivity | Reflective Silver 0.03 / Anti-Glare 0.05 |
| Surface Corrosion | Pass |
| Flammability Index | Low ( $\leqslant 5$ ) |
| Early Fire Hazard | 0/0/0/1 |
| Duty Rating, Tensile Strength | EXTRA HEAVY DUTY |
| Duty Rating, Edge Tear Resistance | EXTRA HEAVY DUTY |
| Resistance to Dry Delamination | Pass |
| Resistance to Wet Delamination | Pass |
| Water Control Classification | Water Barrier |
| Vapour Classification (VCM) | Class 2,Vapour Barrier |
| Electrical Conductivity | Conductive |

## THERMAL PERFORMANCE

| Application |  | Winter (Heat Flow Out) | Summer (Heat Flow In) |
| :---: | :---: | :---: | :---: |
|  | Flat Metal roof, suspended ceiling, 300 mm min. reflective air space | 1.17 | 3.05 |
|  | Pitched metal roof $22^{\circ}$ flat ceiling, unventilated attic space | 1.33 | 2.17 |
|  | Pitched metal roof $22^{\circ}$ flat ceiling, ventilated attic space | 1.10 | 2.44 |
|  | Flat Metal Roof with no ceiling (Warehouse) | 0.72 | 1.36 |
| $\frac{\bar{n}}{n}$ | Brick Veneer Wall | 1.95 | 1.92 |
|  | Double Brick Wall | 2.12 | 2.09 |

The total R-values of the above systems for winter and summer conditions have been determined in accordance with the requirements of AS/NZS4859.1. The contribution of this product total R-value depends on installation and environmental conditions. The R -value will be reduced in the event of the accumulation of dust on upward facing surfaces and in those cavities that are ventilated. Where the cavity is sealed, it is assumed there is no dust and hence emittance is not derated.

## BAL (BUSHFIRE ATTACK LEVEL) RATING

| For use in Roof Systems | BAL LOW to BAL 40 |
| :---: | :---: |
| For use in Wall Systems | BAL LOW to BAL FZ |

## SAFETY INSTRUCTIONS

No personal protective equipment is required, however, it is recommended that UV protective sunglasses be worn when installing outside. This product is non-hazardous. When installing ensure that all electrical cabling, fittings, and wiring are in a safe condition and there is no potential for contact with live wiring or down-lights. Ensure a minimum 50mm clearance from light fittings (check for safe distance with lighting supplier) and ensure 50 mm clearance around hot flues. Plastic fixings should be used where any electrical componentry is in close vicinity of the installation materials. Do not use any metal fixings if working in close vicinity of electrical wiring.
